Data Migration

Great products available from Business Intelligence:

DataLinks Dashboard Builder: Build Interactive Dashboards with our automated dashboard builder in a matter of minutes. Magazine quality dashboards can be yours with little to no effort.

DataLinks Query: Access disparate data sources without knowing SQL. Connect to difficult to reach data creating live links to Excel or exports to XML/CSV. Write queries and reports faster than any other tool on the market today.

DataLinks Pro: DataLinks Pro allows for virtual data warehouses to be built in minutes right from your desktop and right out of the box. Create schema layers that allow users to interact across Server, Desktop, and Web data in minutes. DataLinks makes Data integration easier than ever before.

Business Intelligence Inc. (BII) offers a complete suite of Data Integration and Reporting services implemented by individual consultants or project teams utilizing the best tools on the market, including our DataLinks™ reporting engine, an extremely lightweight, affordable, and flexible desktop Enterprise Information Integration (EII) solution.

Our Individual Consultants deliver the hard-to-find expertise you need, including:

Excel-based Dashboard Development using DataLinks™ to connect to virtually any data source.

Data Migration Tools and Expertise to efficiently move your data from one system to another.

Desktop Enterprise Information Integration Tools customized to your data sources.

Custom Reporting Solutions utilizing our own ReadyData™, a highly customizable Excel-based reporting solution built on the DataLinks™ EII platform for maximum flexibility in getting access to and reporting on your data using tools you already own.

Custom Software Development using tools from 3GL to .NET to VBA, our team of veteran programmers has done it all. Specializing in Microsoft programming for client/server, web, and handheld-device platforms.

Our Project Teams solve your enterprise reporting problems:

Data Warehousing - We will get a handle on your data. Relational and Dimensional Modeling, OLAP and Cube Design, Performance Tuning. Certified in SQL Server and Oracle.

Reporting Tools Evaluation & Selection - From Excel to Cognos we will assist you in selecting the best reporting tools in the industry for your needs. Our DataLinks™ desktop EII software suite provides the most economical means of reporting on data from one or multiple sources.

Reporting Tools Implementation - We install, configure, and customize reporting solutions to meet your exact needs. Certified in Microsoft, Cognos, and ProClarity.

Custom Programming - From C/C++ to .NET, our team of veteran programmers do it all, in half the time and a fraction of the price. Specializing in Microsoft programming for client/server, web, and handheld-device platforms.

Project Management - Our experienced project managers guarantee that our Project Teams hit the mark every time. Your satisfaction is our guarantee.

Source System - We work with all major source system vendors, ranging from customer relationship management software to supply chain management software.
